

Doug Rehman K4AC

for

ARRL Southeastern Division Director

After being licensed for 33 years, I still find myself continually learning and experimenting with new operating modes and frequencies. I am active on HF thru 1.2 GHz and am in the process of adding all bands thru 10 GHz.

The ARRL is a good organization that's drifting away from its membership and the most urgent issue it's facing is to reestablish two way communications with its members. Through in person meetings, email, and a blog, I'll keep you informed and solicit your input. To ensure you're represented, I'll appoint Assistant Directors from all corners of the Division and create an advisory Council of Affiliated Club Presidents.

Using existing and emerging technologies, we can: facilitate communications to and from members; lower the cost of ARRL products to its members; and increase the value of membership and club affiliation.

I would like to hear your opinions of what's working well or needs improvement, your ideas to make the ARRL a better organization, and what you would like to see your Division Director do. Email me at doug@k4ac.com.

For much more information about why I am running for Director, my plans, and my thoughts, please visit my campaign website at www.k4ac.com and my campaign blog at www.k4ac.net. As you choose your Southeastern Division Director, please consider my *experience in leadership, business management, publishing, and public speaking*, coupled with my *organizational skills, creative approach to problem solving, integrity, willingness to listen to all sides of an issue, and desire to be your voice*.
