

AMRC Sunday Night Net

Is the repeater in use?

Pause

This is the Alford Memorial Radio Club Sunday night net. This net is called for the purpose of informing the general amateur radio community of the activities of the Alford Memorial Radio Club ... to identify amateur radio activities in the Atlanta area that might be of interest to club members and to conduct a Buy, Sell, and Swap portion of the net. Everyone is welcome to check in. You do not have to be a member of the Alford Memorial Radio Club to participate.

This is *Your Call*. My name is "Your Name" and my QTH is *Your QTH*. I will be net control for tonight's net. You may also check into this net via Echolink if you are not in range of the repeater via Echolink node W4BOC-R or node 330246. We log the net check-ins on the club's web based logger, AMRClog, at w4boc.org. You can follow along with the other net check-ins and chat with other stations during the net using the club's AMRClog at w4boc.org.

At this time do we have any emergency traffic?"

Pass the traffic if you get a response.... otherwise announce:

Hearing none. Please remember, anyone with emergency traffic can break the net at any time."

Do we have any priority or routine traffic for the net?"

Acknowledge and handle.

This is *Your Call*", net control for tonight's net. I will now start taking check-ins. Please speak slowly so that I can accurately log you into the net giving your call sign, first name, and location.

I will now take short-time check-ins. Short time checkins only. Please call now

I will now take mobile check-ins. Mobile checkins only. Please call now

I will now take Echolink check-ins.

I will now take Club Officers and Committee Chairpersons.

Do we have any announcements or Buy, Sell, or Swap items. If so, please call now

Acknowledge and handle.

This is <your call>, net control for tonight's net. I will now open the net for general check-ins.

Once it seems all have called in make a last call for check-ins.

If none heard announce:

Hearing no further check-ins, this will conclude tonight's net. I would like to thank all who participated. We had ____ check-ins for tonight's net. This is *Your Call* closing the net at *time* local and returning the repeater back to normal operation.
